

ABSTRACT

A method of manufacturing cosmetic powder puffs is provided. First, a plurality of powder puff layers are stacked in an orderly manner. Next, adhesive layers are disposed between the powder puff layers respectively. Next, a thermal treatment process is carried out so that the adhesive layers adhere the powder puff layers together to form a powder puff block. Next, the powder puff block is cut to obtain a plurality of powder puff slices. Finally, the powder puff slices are trimmed to obtain a plurality of attractive cosmetic powder puffs.
